## EDUCATION

### University of Central Punjab

Bachelor of Science in Software Engineering, CGPA: 3.14/4

Lahore, Pakistan

Mar 2022 – Feb 2026

- Major: Software Development — Minor: Quality Assurance
- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Information Security

## EXPERIENCE

### Software Developer Intern

Star Automation

Jun 2026 – Present

Lahore, Pakistan

- Developed and maintained web applications using PHP and the Laravel framework
- Collaborated with the development team to build and enhance backend features and database-driven functionality
- Assisted in debugging, testing, and deploying application updates

### Software Development Intern

SkimCode Pakistan

July 2025 – Sep 2025

Lahore, Pakistan

- Collaborated with cross-functional teams to develop and enhance web applications using Java and Spring Framework
- Participated in Agile/Scrum ceremonies including daily stand-ups, sprint planning, and code reviews
- Contributed to feature development and resolved critical bug fixes, improving application stability by 15%
- Utilized Git for version control and implemented best practices for collaborative software development

## PROJECTS

### CalTrack - AI-Powered Calorie Tracking Platform | React.js, FastAPI, MongoDB, TensorFlow, CNN

(Final Year Project)

- Engineered full-stack web application with AI-driven food recognition using CNN and Zero-Shot Learning models
- Developed RESTful APIs for user authentication, food logging, barcode scanning, and real-time analytics dashboard
- Implemented secure JWT authentication, meal tracking, exercise logging, and gamification features (streaks, badges)
- Designed responsive UI/UX with React.js and optimized database queries in MongoDB for improved performance

### CarHub - Vehicle Listing Platform | MERN Stack, RESTful APIs, Figma

- Built scalable car marketplace using React, Node.js, Express, and MongoDB with responsive mobile-first design
- Implemented complete CRUD operations, user authentication system, and comprehensive error handling
- Integrated RESTful APIs for seamless data management and designed intuitive UI/UX prototypes in Figma

### Machine Learning Portfolio | Python, TensorFlow, NLP, OpenCV

- Developed NLP-based chatbot with intent recognition for intelligent user interaction and query resolution
- Built CNN image classifier achieving 90% accuracy on test dataset using convolutional neural networks
- Created real-time speech-to-text and text-to-speech conversion tools using deep learning models
- Implemented automated text summarization system using natural language processing techniques

### Bank Database Management System | MySQL, SQL, Database Design

- Designed normalized relational database schema following 3NF principles for customer, account, and transaction data
- Optimized complex SQL queries and implemented stored procedures to improve transaction processing efficiency

## TECHNICAL SKILLS

**Languages:** JavaScript, C++, C, Python, SQL, HTML/CSS

**Frameworks & Libraries:** React.js, Node.js, Express.js, FastAPI, Spring Framework, TensorFlow, Bootstrap, Laravel

**Databases:** MongoDB, MySQL

**Developer Tools:** Git, GitHub, Linux, Jira, Taiga, Postman, VS Code

**Technical Concepts:** Data Structures & Algorithms, OOP, RESTful APIs, Agile/Scrum, Machine Learning (CNN, NLP), UI/UX Design, Database Normalization, JWT Authentication
